

Automate SSL Certificate Management

As SSL certificate lifespans continue to decrease, organizations need more efficient ways to manage renewals, validation, and certificate operations. BrandShelter's SSL API featuring ACME support helps organizations simplify certificate management and reduce operational risk.

The Industry Is Changing

SSL certificate lifetimes are getting shorter. What was once an annual task is becoming a continuous operational process.

Organizations managing SSL certificates often face:

- ✓ Manual ordering and renewal processes
- ✓ Limited visibility across certificate inventories
- ✓ Operational overhead from validation requirements
- ✓ Increased risk of expired certificates and service disruptions
- ✓ Managing certificates across growing domain portfolios and environments

The BrandShelter Solution

BrandShelter's SSL API helps organizations automate certificate lifecycle management and integrate SSL operations directly into existing infrastructure and workflows.

Key Capabilities

- ✓ SSL certificate ordering and issuance
- ✓ Automated DNS-based validation
- ✓ Certificate renewals and reissuance

- ✓ Certificate revocation
- ✓ Certificate status and lifecycle visibility

ACME Protocol Support

BrandShelter supports the ACME protocol, allowing organizations to automate certificate management using industry-standard tooling.

Compatible with:

✓ Certbot

✓ acme.sh

✓ lego

✓ win-acme

✓ Traefik

✓ Caddy

✓ Other RFC 8555-compliant ACME clients

Integrate certificate automation into existing workflows without changing the tools your teams already use.

Why Choose Us

15+ Years of Domain & Brand Protection Expertise

Leverage the experience of a trusted partner with deep expertise in domain management, brand protection, and enforcement services.

Centralized Digital Asset Management

Manage SSL certificates alongside domain portfolios, DNS infrastructure, and other critical digital assets through a single provider.

Built for Enterprise Complexity

Support global teams, large domain portfolios, and evolving security requirements with scalable solutions and dedicated account support.
